Standards for Mathematical Practice	1.	Make sense of problems and persevere in solving them.	<p><b><u>INSTRUCTION:</u></b>  <b>New Concept:</b> Lesson 1, pp. 7-10; Lesson 11, pp. 75-79; Lesson 14, pp. 93-98; Lesson 22, pp. 157-159; Lesson 28, pp. 194-197; Lesson 41, pp. 296-299; Lesson 50, pp. 352-355; Lesson 52, pp. 369-372; Lesson 55, pp. 386-389; Lesson 81, pp. 562-565; Lesson 106, pp. 739-741  <b>Investigation:</b> Investigation 4, pp. 293-295; Investigation 8, pp. 558-561; Investigation 11, pp. 773-777</p> <p><b><u>MAINTENANCE:</u></b>  <b>Problem Solving:</b> Lesson 1, p. 6; Lesson 14, p. 93; Lesson 20, p. 134; Lesson 28, p. 194; Lesson 30, p. 208; Lesson 34, p. 241; Lesson 45, p. 323; Lesson 56, p. 393; Lesson 68, p. 480; Lesson 74, p. 518; Lesson 81, p. 562; Lesson 100, p. 693; Lesson 109, p. 759; Lesson 117, p. 817  <b>Written Practice:</b> Lesson 3, pp. 24-25 (#1, #2, #15); Lesson 14, pp. 98-99 (#1, #2, #5); Lesson 17, pp. 118-119 (#2, #13, #20); Lesson 24, pp. 172-174 (#3, #5); Lesson 31, pp. 225-227 (#1, #2, #16); Lesson 54, pp. 382-385 (#9, #16, #24); Lesson 71, pp. 504-506 (#2, #3, #20); Lesson 87, pp. 600-603 (#2, #17, #18); Lesson 96, pp. 664-667 (#1, #3); Lesson 107, pp. 751-753 (#3, #16, #24); Lesson 115, pp. 806-808 (#1, #9, #12); Lesson 120, pp. 841-843 (#1, #11)</p> <p><b>Standards Success Activity:</b> Activity 7, pp. 13-14, Activity 9, pp. 17-18, Activity 10, pp. 19-20, Activity 11, pp. 21-22, Activity 12, pp. 23-24, Activity 17, pp. 33-34, Activity 26, pp. 51-52</p>	<p>Developing enthusiastic, independent, and proficient problem solvers is the focus of the <i>Saxon Math</i> series. To reinforce this commitment from day one, <i>Course 2</i> opens with a “Problem-Solving Overview” on pages 1 - 5. Working from Polya’s classic four-step problem solving process, and beginning with ten general strategies, students are guided to <b>understand</b> the information that has been provided and the question being asked, to <b>plan</b> accordingly, to use their plan to <b>solve</b> the problem while remaining open to re-direction, and to <b>check</b> their solution for reasonableness and possible extensions.</p> <p>The process and strategies outlined in the overview are discussed daily in the Problem Solving portion of the daily Power Up, and practiced daily in the integrated Written Practice, where students are not only expected to solve, but to also formulate problems. All problems build in complexity throughout the year, and to support good questioning, teacher materials include a “Problem Solving Discussion Guide” for each Power-Up, and “Math Conversation” prompts for each Lesson and Written Practice.</p> <p>Saxon’s pedagogy of daily integrating and gently evolving domains simultaneously naturally promotes <b>perseverance</b>. Students are provided both the time to master and the material to maintain skill sets. This avoids the current phenomenon of students learning enough to get by on the next test but forgetting those skills shortly thereafter, forcing them to be reviewed again the following year.</p>

Domain	Standard	Text of Objective	<i>Saxon Math Course 2 Citations</i>	Narrative
Standards for Mathematical Practice	2.	Reason abstractly and quantitatively.	<p><b><u>INSTRUCTION:</u></b>  <b>New Concept:</b> Lesson 3, pp. 21-23; Lesson 12, pp. 83-85; Lesson 14, pp. 93-98; Lesson 79, pp. 545-546; Lesson 96, pp. 660-663; Lesson 100, pp. 693-696  <b>Investigation:</b> Investigation 8, pp. 558-561</p> <p><b><u>MAINTENANCE:</u></b>  <b>Problem Solving:</b> Lesson 2, p. 13; Lesson 5, p. 34; Lesson 6, p. 40; Lesson 15, p. 100; Lesson 34, p. 241; Lesson 38, p. 273; Lesson 45, p. 323; Lesson 56, p. 393; Lesson 64, p. 453; Lesson 66, p. 466; Lesson 79, p. 545; Lesson 90, p. 618  <b>Written Practice:</b> Lesson 3, pp. 24-25 (#2, #7, #9); Lesson 4, pp. 32-33 (#7, #9, #10); Lesson 13, pp. 90-92 (#1, #3, #7); Lesson 14, pp. 98-99 (#2, #5, #30); Lesson 16, pp. 111-113 (#1, #4, #14); Lesson 90, pp. 621-623; Lesson 96, pp. 664-667 (#14, #27); Lesson 100, pp. 696-698 (#2, #11, #18); Lesson 101, pp. 707-709 (#7, #10, #28); Lesson 102, pp. 714-716 (#1, #18, #24)</p> <p><b>Standards Success Activity:</b> Activity 16, pp. 31-32, Activity 17, pp. 33-34, Activity 22, pp. 43-44, Activity 23, pp. 45-46, Activity 26, pp.51-52, Activity 27, pp. 53-54</p>	<p>The foundation of the <i>Saxon Math</i> series is mathematically proficient students, as measured by computational fluency, effective modeling of conceptual understanding, and meaningful application of concepts. Daily Written Practice does not focus simplistically on one standard at a time, but involves multiple domains just as real-world situations require. Examples and Practice Problems in the student text are marked with blue icons signifying to students the need to coherently “Generalize,” “Represent,” “Formulate,” and “Model” their work. Students develop habits of fluency and flexibility in both contextualizing (generating models of their understanding) and decontextualizing (simplifying a problem into symbolic form).</p>

Domain	Standard	Text of Objective	Saxon Math Course 2 Citations	Narrative
Standards for Mathematical Practice	3.	Construct viable arguments and critique the reasoning of others.	<p><b><u>INSTRUCTION:</u></b>  <b>New Concept:</b> Lesson 12, pp. 83-85; Lesson 16, pp. 107-111; Lesson 29, pp. 200-204; Lesson 94, pp. 648-650  <b>Investigation:</b> Investigation 8, pp. 558-561</p> <p><b><u>MAINTENANCE:</u></b>  <b>Problem Solving:</b> Lesson 3, p. 20; Lesson 15, p. 100; Lesson 20, p. 134; Lesson 35, p. 247; Lesson 43, p. 309; Lesson 57, p. 400; Lesson 64, p. 453; Lesson 75, p. 523; Lesson 82, p. 569; Lesson 95, p. 653; Lesson 103, p. 717; Lesson 113, p. 791  <b>Written Practice:</b> Lesson 12, pp. 85-87 (#3, #4, #5); Lesson 19, pp. 131-133 (#4, #7, #29); Lesson 22, pp. 161-161 (#27); Lesson 29, pp. 204-207 (#1, #8, #9); Lesson 30, pp. 213-215 (#3, #6, #8); Lesson 33, pp. 239-240 (#4, #28, #29); Lesson 35, pp. 251-254 (#28); Lesson 70, pp. 493-495 (#19); Lesson 94, pp. 650-652 (#30); Lesson 95, pp. 656-659 (#17)</p> <p><b>Standards Success Activity:</b> Activity 3, pp. 5-6, Activity 4, pp. 7-8, Activity 14, pp. 27-28, Activity 19, pp. 37-38, Activity 24, pp. 47-48</p>	<p>Mathematically proficient students are able to communicate their personal thinking, ask useful questions, and clarify or improve upon the arguments of others. The opening “Power Up” activities of each lesson provided throughout the <i>Saxon Math</i> series are designed to foster discussion within the classroom and amongst classmates as to individual perspectives and preferences, strategies, and techniques of problem solving. Students hear and respond to novel approaches to solve problems, and teachers guide the discussion to ensure that student answers are based on solid mathematical reasoning.</p> <p>Examples, Practice Problems, and “Thinking Skill” prompts in the margins of the student text are marked with blue icons signifying to students the need to “Discuss,” “Explain,” “Justify,” and “Verify” their solutions.</p> <p>Teacher Manuals provide daily “Error Alert” and “Error and Misconceptions Analysis” prompts to emphasize opportunities for evaluative discussion of student thinking.</p>

Standards for Mathematical Practice	4.	Model with mathematics	<p><b><u>INSTRUCTION:</u></b>  <b>New Concept:</b> Lesson 7, pp. 46-50; Lesson 9, pp. 60-61, Examples 2-3; Lesson 22, pp. 157-159; Lesson 25, pp. 175-179; Lesson 98, pp. 677-682, Examples 1-2, 4-5; Lesson 102, pp. 710-713, Examples 1-2, 5  <b>Investigation:</b> Investigation 1, pp. 72-74; Investigation 2, pp. 143-148; Investigation 4, pp. 293-295; Investigation 11, pp. 773-777</p> <p><b><u>MAINTENANCE:</u></b>  <b>Problem Solving:</b> Lesson 14, p. 93; Lesson 28, p. 194; Lesson 30, p. 208; Lesson 34, p. 241; Lesson 40, p. 285; Lesson 50, p. 352; Lesson 54, p. 380; Lesson 90, p. 618  <b>Written Practice:</b> Lesson 24, pp. 172-174 (#4, #6, #12); Lesson 26, pp. 185-187 (#8, #10, #30); Lesson 36, pp. 261-263 (#5, #16); Lesson 56, pp. 397-399 (#23, #29); Lesson 62, pp. 444-446 (#6); Lesson 71, pp. 504-506 (#18); Lesson 77, pp. 537-539; Lesson 83, pp. 577-579 (#9); Lesson 87, pp. 600-603; Lesson 100, pp. 696-698 (#13, #14, #25); Lesson 118, pp. 828-830 (#5, #10)  <b>Standards Success Activity:</b> Activity 15, pp. 29-30, Activity 18, pp. 35-36, Activity 22, pp. 43-44, Activity 23, pp. 45-46</p>	<p><i>Saxon Math</i> is based on the belief that people learn by doing, and the ultimate “doing” is applying mathematical concepts to everyday life situations. The <i>Saxon Math</i> series seeks to produce mathematically proficient students who can then use the quantitative skills they have honed to create solutions, and apply quantitative methods to practical challenges. Examples and Practice Problems in the student text are marked with blue icons signifying to students the need to “Represent,” “Formulate,” and “Model” their work. Visual support throughout the program ensures that students are able to represent mathematical situations using charts, tables, and other graphic organizers to guide their understanding of increasingly complex problems.</p> <p>One key example in <i>Course 2</i> involves the ratio box. First introduced in Lesson 53, this problem-solving tool serves as an important middle step that allows students to model a concrete mathematical problem before making the leap to an abstract proportional relationship. It is first used for straight-forward ratio word problems but gradually builds towards more complicated problem-solving situations, including (but not limited to) percent of change, scale models, and successive discounts.</p>

Domain	Standard	Text of Objective	<i>Saxon Math Course 2 Citations</i>	Narrative
Standards for Mathematical Practice	5.	Use appropriate tools strategically.	<p><b><u>INSTRUCTION:</u></b>  <b>New Concept:</b> Lesson 17, pp. 115-118; Lesson 34, pp. 241-244; Lesson 37, pp. 264-270; Lesson 43, pp. 309-313; Lesson 51, pp. 363-366; Lesson 52, pp. 369-372; Lesson 57, pp. 400-403; Lesson 65, pp. 459-462; Lesson 112, pp. 784-787  <b>Investigation:</b> Investigation 2, pp. 143-148; Investigation 3, pp. 216-220; Investigation 7, pp. 496-501; Investigation 10, pp. 699-703</p> <p><b><u>MAINTENANCE:</u></b>  <b>Problem Solving:</b> Lesson 2, p. 13; Lesson 24, p. 169; Lesson 30, p. 208; Lesson 34, p. 241; Lesson 50, p. 352; Lesson 80, p. 550  <b>Written Practice:</b> Lesson 17, pp. 118-119 (#6, #10); Lesson 18, pp. 124-127 (#25, #26); Lesson 19, pp. 131-133 (#13); Lesson 22, pp. 160-161 (#28); Lesson 25, pp. 179-181 (#2, #4, #15); Lesson 32, pp. 232-234 (#29, #30); Lesson 36, pp. 261-263 (#6, #13, #30); Lesson 37, pp. 270-272 (#7, #15, #29)</p> <p><b>Standards Success Activity:</b> Activity 5, pp. 9-10, Activity 8, pp. 15-16, Activity 18, pp. 35-36, Activity 25, pp. 49-50, Activity 28, pp. 55-56</p>	<p><i>Saxon Math</i> requests and requires the use of grade level appropriate tools for instruction and problem solving. This begins with concrete models at the primary level, regularly includes representational tools such as graphs, charts, tables and diagrams, and moves to more sophisticated tools like geometry software at the secondary level. Saxon offers instruction and guidance for appropriate use of tools throughout the program, and has compiled a complete manipulative set for grades 6–8. Icons in the margins of the textbook indicate to students appropriate places for use of scientific calculators, and graphing calculator icons indicate related/extension activities available on-line.</p> <p>Alongside the standard use of tools, “Alternate Approach with Manipulatives” notes in the Teacher Manual and the “Adaptation Teaching Guide” provide additional techniques for working with at-risk students via standard manipulatives, reference guides, and adaptation prompts. Students learn how these tools and resources can support them in solving problems without over-relying on them or letting them impede their ability to solve problems independently.</p>

Domain	Standard	Text of Objective	Saxon Math Course 2 Citations	Narrative
Standards for Mathematical Practice	6.	Attend to precision.	<p><b><u>INSTRUCTION:</u></b>  <b>New Concept:</b> Lesson 8, pp. 54-58; Lesson 15, pp. 100-104; Lesson 17, pp. 115-118; Lesson 20, pp. 134-139; Lesson 32, pp. 228-231; Lesson 34, pp. 241-244; Lesson 35, pp. 247-251  <b>Investigation:</b> Investigation 2, pp. 143-148; Investigation 3, pp. 216-220; Investigation 10, pp. 699-703; Investigation 11, pp. 773-777</p> <p><b><u>MAINTENANCE:</u></b>  <b>Problem Solving:</b> Lesson 69, p. 485; Lesson 79, p. 545; Lesson 80, p. 550; Lesson 82, p. 569  <b>Written Practice:</b> Lesson 15, pp. 105-106 (#3, #5, #8); Lesson 16, p. 112 (#5, #6, #9); Lesson 21, pp. 154-156 (#3, #4, #25); Lesson 22, pp. 160-161 (#7, #11, #28); Lesson 32, pp. 233-234 (#15, #29, #30); Lesson 34, pp. 245-246 (#12, #14, #27); Lesson 35, pp. 252-253 (#9, #11, #14); Lesson 37, pp. 270-272 (#3, #16, #28); Lesson 66, pp. 468-471 (#3, #18, #30); Lesson 86, pp. 595-597 (#15, #20)</p> <p><b>Standards Success Activity:</b> Activity 2, pp. 3-4, Activity 3, pp. 5-6</p>	<p>To ensure students calculate accurately and efficiently, and then maintain that proficiency, 30 fully integrated and evolving Written Practice problems have been designed to daily guarantee students’ minds do not go on autopilot, which is the brain’s natural tendency when presented with too many of the same thing in a single sitting. Conscientious effort has been made by author Stephen Hake to guarantee that if, for example, a proportional reasoning problem is to be posed daily, that it be presented from different perspectives so as to very naturally require and instill attention to detail. Students may simply define the process on one day, represent the problem symbolically the next day, formulate their own problem, or generate a solution – but for different components each time. Each practice and assessment question is referenced to its lesson of initial instruction to encourage students to reference rather than guess when in doubt.</p> <p>Automaticity of basic skill sets is promoted with a 2-3 minute timed practice set that opens the Power-Up portion of each lesson.</p> <p>Parallel to the student textbook, the “Student Adaptation Workbook” provides additional starting points, hints/tips for progressing, and reminders to label to encourage and reinforce precision with special needs and at-risk students.</p>

Domain	Standard	Text of Objective	Saxon Math Course 2 Citations	Narrative
Standards for Mathematical Practice	7.	Look for and make use of structure.	<p><b><u>INSTRUCTION:</u></b>  <b>New Concept:</b> Lesson 2, pp. 14-18; Lesson 9, pp. 60-63; Lesson 15, pp. 100-104; Lesson 19, pp. 128-131; Lesson 41, pp. 296-299; Lesson 52, pp. 369-372; Lesson 81, pp. 562-565; Lesson 85, pp. 586-589; Lesson 101, pp. 704-707; Lesson 106, pp. 739-741; Lesson 108, pp. 754-755  <b>Investigation:</b> Investigation 11, pp. 773-777</p> <p><b><u>MAINTENANCE:</u></b>  <b>Written Practice</b> Lesson 3, p. 24 (#3, #5, #6); Lesson 7, pp. 51-52 (#2, #23, #24); Lesson 14, p. 99 (#8, #21, #22); Lesson 19, pp. 131-133 (#4, #8, #30); Lesson 27, pp. 191-193 (#9, #6, #16); Lesson 41, pp. 299-301 (#9, #14, #29); Lesson 42, pp. 305-308 (#8, #19, #21); Lesson 59, pp. 417-419 (#14, #28); Lesson 60, pp. 423-426 (#21, #22); Lesson 81, pp. 565-568 (#10, #16, #26); Lesson 85, pp. 585-591 (#17, #28); Lesson 101, pp. 707-709 (#5, #11, #13); Lesson 107, pp. 751-753 (#11, #16, #30)</p> <p><b>Standards Success Activity:</b> Activity 20, pp. 39-40, Activity 21, pp. 41-42, Activity 27, pp. 53-54</p>	<p><i>Saxon Math</i> builds solid structure throughout the program first by explicitly teaching number properties and how concepts connect, and then by encouraging students to use both problem solving strategies and their skill fluency to notice possible patterns and apply basic structures to new or unique challenges. Saxon’s program gradually evolves from these particulars to the deeper structures inherent in the discipline.</p> <p>The integrated Written Practice takes this one step further by forcing students to develop flexibility in their mathematical understanding. Rather than presenting 20 identical problems with slightly different numeration side-by-side, <i>Saxon Math</i> asks students to practice a myriad of concepts from different strands on a daily basis, ensuring that their use of structure is not simply a function of the problem type.</p> <p>Author Stephen Hake is careful to phrase examples and practice problems of a single concept in a variety of ways to assure flexibility of student thinking exists within the fluency. “What is NOT?” is a frequent form of questioning, and blue icons identify “Connect,” “Classify,” and “Analyze” questions within the Written Practice that require students to step back, get an overview of the problem at hand, and shift their perspective if necessary.</p>

Domain	Standard	Text of Objective	Saxon Math Course 2 Citations	Narrative
Standards for Mathematical Practice	8.	Look for and express regularity in repeated reasoning.	<p><b><u>INSTRUCTION:</u></b>  <b>New Concept:</b> Lesson 4, pp. 29-31; Lesson 6, pp. 40-43; Lesson 24, pp. 169-172; Lesson 27, pp. 188-191; Lesson 115, pp. 804-806  <b>Investigation:</b> Investigation 8, pp. 558-561, Investigation 11, pp. 773-777</p> <p><b><u>MAINTENANCE:</u></b>  <b>Problem Solving:</b> Lesson 1, p. 6; Lesson 12, p. 82; Lesson 16, p. 107; Lesson 21, p. 149; Lesson 42, p. 302  <b>Written Practice:</b> Lesson 4, pp. 32-33 (#4, #5, #17); Lesson 5, pp. 38-39 (#2, #6, #28); Lesson 8, pp. 58-59 (#1, #4, #26); Lesson 25, pp. 179-181 (#9, #13, #30); Lesson 26, pp. 185-187 (#9, #14, #21); Lesson 28, pp. 197-199 (#7, #8, #15); Lesson 31, pp. 225-227 (#21, #29); Lesson 117, pp. 821-824 (#2, #13, #19); Lesson 119, pp. 834-836 (#8)</p>	<p>Distributing the instruction of key concepts over the course of the school year allows Saxon curriculum to daily visit the ever increasing “big picture,” while attending to finer and finer detail. The development of regularity and repeated reasoning in Saxon students happens over the entire year rather than “cramming” repeated exposures to skills and concepts into a massed practice set or a three-week chapter or unit. This is a much more natural progression of skills, allowing students to discover these patterns and develop a deeper mathematical understanding at their own pace.</p> <p>“Shortcuts” are not introduced or utilized in Saxon until students exemplify proficiency with all subtasks of the skill set. For instance, in Lesson 16 of <i>Course 2</i> students revisit function tables, and in Investigation 3 the coordinate plane. They proceed to plotting (Lesson 56) and graphing (Investigation 9) functions, solve and transform literal equations (Lesson 106), and define slope (Lesson 107), but not until Lesson 116 is the “aha” – the shortcut - of using the slope-intercept method of graphing linear equations utilized. Frequently in Saxon, the shortcut has already been discovered and utilized by students themselves by the time it is formally introduced.</p>

7.NS The Number System		Apply and extend previous understandings of operations with fractions to add, subtract, multiply, and divide rational numbers.	Operations with fractions are revisited early in <i>Course 2</i> , and are then able to be utilized daily throughout the course. Operations with rational numbers for 7th grade is expanded upon in <i>Course 2</i> at the following points: Lesson 2 Properties of Operations Lesson 42 Repeating Decimals Lesson 43 Converting Fractions to Decimals Lesson 52 Order of Operation Lesson 59 Adding Integers on a Number Line Lesson 63 Symbols of Inclusion (including Absolute Value) Lesson 64 Adding Positive and Negative Numbers Lesson 68 Algebraic Addition Lesson 73 Multiplying and Dividing Positive and Negative Rational Numbers (whole, decimal, fraction) Lesson 76 Complex Fractions Lesson 86 Number Families (Classifying Rational Numbers) Lesson 118 Division by Zero
	7.NS.1	Apply and extend previous understandings of addition and subtraction to add and subtract rational numbers; represent addition and subtraction on a horizontal or vertical number line diagram.	
	7.NS.1.a	Describe situations in which opposite quantities combine to make 0.	<p><b><u>INSTRUCTION:</u></b>  <b>New Concept:</b> Lesson 59, pp. 413-416; Lesson 68, pp. 480-482</p> <p><b><u>MAINTENANCE:</u></b>  <b>Written Practice:</b> Lesson 59, pp. 417-418 (#4, #7, #12); Lesson 60, pp. 424-425 (#8, #11, #13); Lesson 61, p. 439 (#19); Lesson 62, pp. 445-446 (#11, #29); Lesson 63, p. 450 (#5, #11); Lesson 68, p. 483 (#14); Lesson 71, p. 506 (#29); Lesson 73, p. 517 (#29); Lesson 74, p. 522 (#27)</p> <p><b>Standards Success Activity:</b> Activity 6, pp. 11-12</p>

Domain	Standard	Text of Objective	<i>Saxon Math Course 2 Citations/Examples References in italics indicate foundational.</i>
7.NS The Number System	7.NS.1.b	Understand $p + q$ as the number located a distance $ q $ from $p$ , in the positive or negative direction depending on whether $q$ is positive or negative. Show that a number and its opposite have a sum of 0 (are additive inverses). Interpret sums of rational numbers by describing real-world contexts.	<p><b><u>INSTRUCTION:</u></b>  <b>New Concept:</b> Lesson 59, pp. 413-416; Lesson 68, pp. 480-482</p> <p><b><u>MAINTENANCE:</u></b>  <b>Written Practice:</b> Lesson 59, pp. 417-418 (#4, #7, #12); Lesson 60, pp. 424-425 (#8, #11, #13); Lesson 61, p. 439 (#19); Lesson 62, pp. 445-446 (#11, #29); Lesson 63, p. 450 (#5, #11); Lesson 68, p. 483 (#14); Lesson 71, p. 506 (#29); Lesson 73, p. 517 (#29); Lesson 74, p. 522 (#27)</p> <p><b>Standards Success Activity:</b> Activity 7, pp. 13-14</p>
	7.NS.1.c	Understand subtraction of rational numbers as adding the additive inverse, $p - q = p + (-q)$ . Show that the distance between two rational numbers on the number line is the absolute value of their difference, and apply this principle in real-world contexts.	<p><b><u>INSTRUCTION:</u></b>  <b>New Concept:</b> Lesson 59, pp. 413-416; Lesson 64, pp. 453-456; Lesson 68, pp. 480-482</p> <p><b><u>MAINTENANCE:</u></b>  <b>Written Practice:</b> Lesson 64, p. 457 (#11, #12); Lesson 65, p. 463 (#13); Lesson 66, p. 469 (#14); Lesson 68, p. 483 (#14); Lesson 71, p. 506 (#29); Lesson 73, p. 517 (#29); Lesson 74, p. 522 (#27)</p> <p><b>Standards Success Activity:</b> Activity 9, pp. 17-18</p>
	7.NS.1.d	Apply properties of operations as strategies to add and subtract rational numbers.	<p><b><u>INSTRUCTION:</u></b>  <b>New Concept:</b> Lesson 59, pp. 413-416; Lesson 64, pp. 453-456; Lesson 68, pp. 480-482</p> <p><b><u>MAINTENANCE:</u></b>  <b>Written Practice:</b> Lesson 59, p. 417 (#4, #7); Lesson 60, p. 424 (#8, #11); Lesson 64, p. 457 (#11, #12); Lesson 67, p. 478 (#13, #16); Lesson 68, p. 483 (#14); Lesson 71, p. 506 (#29); Lesson 73, p. 517 (#29); Lesson 74, p. 522 (#27); Lesson 76, p. 533 (#29); Lesson 78, p. 544 (#26, #30)</p>

7.SP Statistics and Probability		<b>Investigate chance processes and develop, use, and evaluate probability models.</b>	Saxon Math <i>Course 2</i> introduces a variety of concepts related to both theoretical and experimental probability, including multiple opportunities for students to explore chance processes and draw conclusions based on these investigations. Students learn and practice the basics of probability models before diving into deeper applications and critical-thinking activities. The lessons focusing on probability include: Lesson 14 Simple Probability Lesson 36 Sample Spaces Investigation 8 Probability and Odds / Compound Events / Experimental Probability Lesson 94 Probability of Dependent Events
	7.SP.5	Understand that the probability of a chance event is a number between 0 and 1 that expresses the likelihood of the event occurring. Larger numbers indicate greater likelihood. A probability near 0 indicates an unlikely event, a probability around 1/2 indicates an event that is neither unlikely nor likely, and a probability near 1 indicates a likely event.	<b><u>INSTRUCTION:</u></b> <b>New Concept:</b> Lesson 14, pp. 95-98; Lesson 36, pp. 257-258; Lesson 94, pp. 648-650 <b>Investigation:</b> Investigation 8, pp. 558-561  <b><u>MAINTENANCE:</u></b> <b>Written Practice:</b> Lesson 38, p. 278 (#11); Lesson 39, p. 284 (#29); Lesson 42, p. 306 (#11); Lesson 44, p. 321 (#9); Lesson 60, p. 426 (#23); Lesson 83, p. 577 (#10); Lesson 85, p. 590 (#10); Lesson 100, p. 697 (#15); Lesson 114, p. 801 (#3)
	7.SP.6	Approximate the probability of a chance event by collecting data on the chance process that produces it and observing its long-run relative frequency, and predict the approximate relative frequency given the probability.	<b><u>INSTRUCTION:</u></b> <b>New Concept:</b> Lesson 14, pp. 95-98; Lesson 36, pp. 257-258 <b>Investigation:</b> Investigation 8, pp. 558-561  <b><u>MAINTENANCE:</u></b> <b>Written Practice:</b> Lesson 38, p. 278 (#11); Lesson 39, p. 284 (#29); Lesson 42, p. 306 (#11); Lesson 44, p. 321 (#9); Lesson 60, p. 426 (#23); Lesson 83, p. 577 (#10); Lesson 85, p. 590 (#10); Lesson 100, p. 697 (#15); Lesson 114, p. 801 (#3)  <b>Standards Success Activity:</b> Activity 14, pp. 27-28

7.SP Statistics and Probability	7.SP.7	<b>Develop a probability model and use it to find probabilities of events. Compare probabilities from a model to observed frequencies; if the agreement is not good, explain possible sources of the discrepancy.</b>	Saxon students have numerous opportunities to build an understanding of basic probability and then expand that knowledge to real-world situations, including comparing theoretical probability to experimental results. Concepts regarding probability models for 7 <sup>th</sup> grade are built upon at the following points within <i>Course 2</i> : Lesson 14 Simple Probability Lesson 36 Sample Spaces Investigation 8 Probability and Odds; Compound Events; Experimental Probability Lesson 94 Probability of Dependent Events
	7.SP.7.a	Develop a uniform probability model by assigning equal probability to all outcomes, and use the model to determine probabilities of events.	<b><u>INSTRUCTION:</u></b> <b>New Concept:</b> Lesson 36, pp. 255-260 <b>Investigation:</b> Investigation 8, pp. 558-561  <b><u>MAINTENANCE:</u></b> <b>Written Practice:</b> Lesson 38, p. 278 (#11); Lesson 39, p. 284; Lesson 42, p. 306 (#11); Lesson 44, p. 321; Lesson 60, p. 426 (#23); Lesson 83, p. 577 (#10); Lesson 85, p. 590 (#10); Lesson 100, p. 697 (#15); Lesson 114, p. 801 (#3)  <b>Standards Success Activity:</b> Activity 15, pp. 29-30
	7.SP.7.b	Develop a probability model (which may not be uniform) by observing frequencies in data generated from a chance process.	<b><u>INSTRUCTION:</u></b> <b>Investigation:</b> Investigation 8, pp. 558-561  <b><u>MAINTENANCE:</u></b> <b>Written Practice:</b> Lesson 83, p. 577 (#10); Lesson 85, p. 590 (#10); Lesson 100, p. 697; Lesson 101, p. 709; Lesson 106, p. 742 (#2); Lesson 109, p. 763 (#12); Lesson 114, p. 801 (#3); Lesson 116, p. 813 (#1); Lesson 117, p. 822 (#13); Lesson , p. 829
